

OpenAI's Quick Guide To Using The Right ChatGPT Model

Read more
→

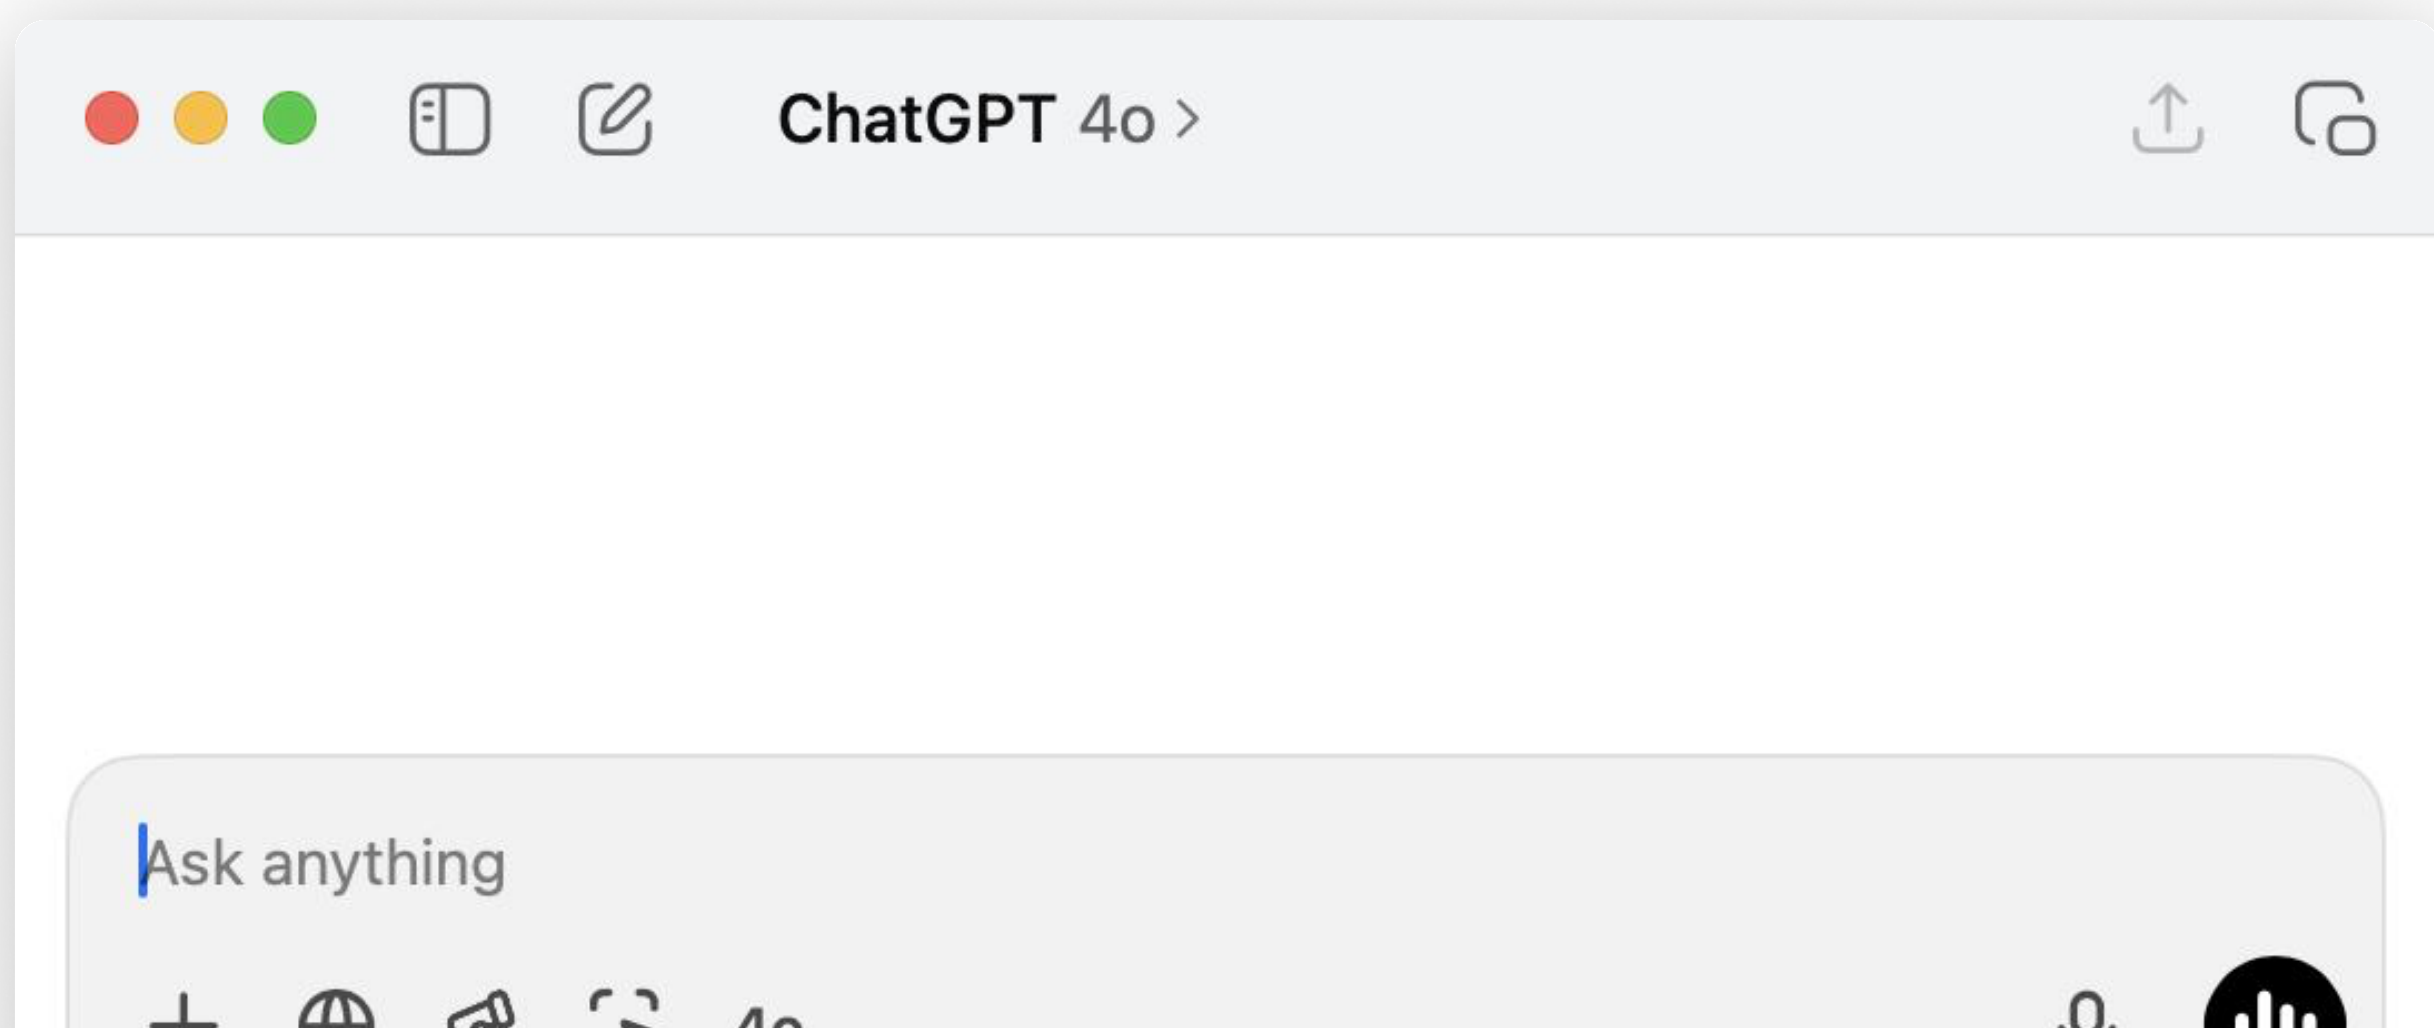

GPT-4o

Excels at everyday tasks: Brainstorming, summarizing, emails, and creative content. Fully multimodal: supports almost all capabilities (GPTs, data analysis, search, image generation, canvas, advanced voice) and inputs (documents, images, CSV files, audio, and video).

Example Prompts:

- Summarize meeting notes into key action items.
- Draft a follow-up email after a project kickoff.
- Proof read my report.
- Brainstorm a launch plan in real time—feel free to upload sketches or screenshots.

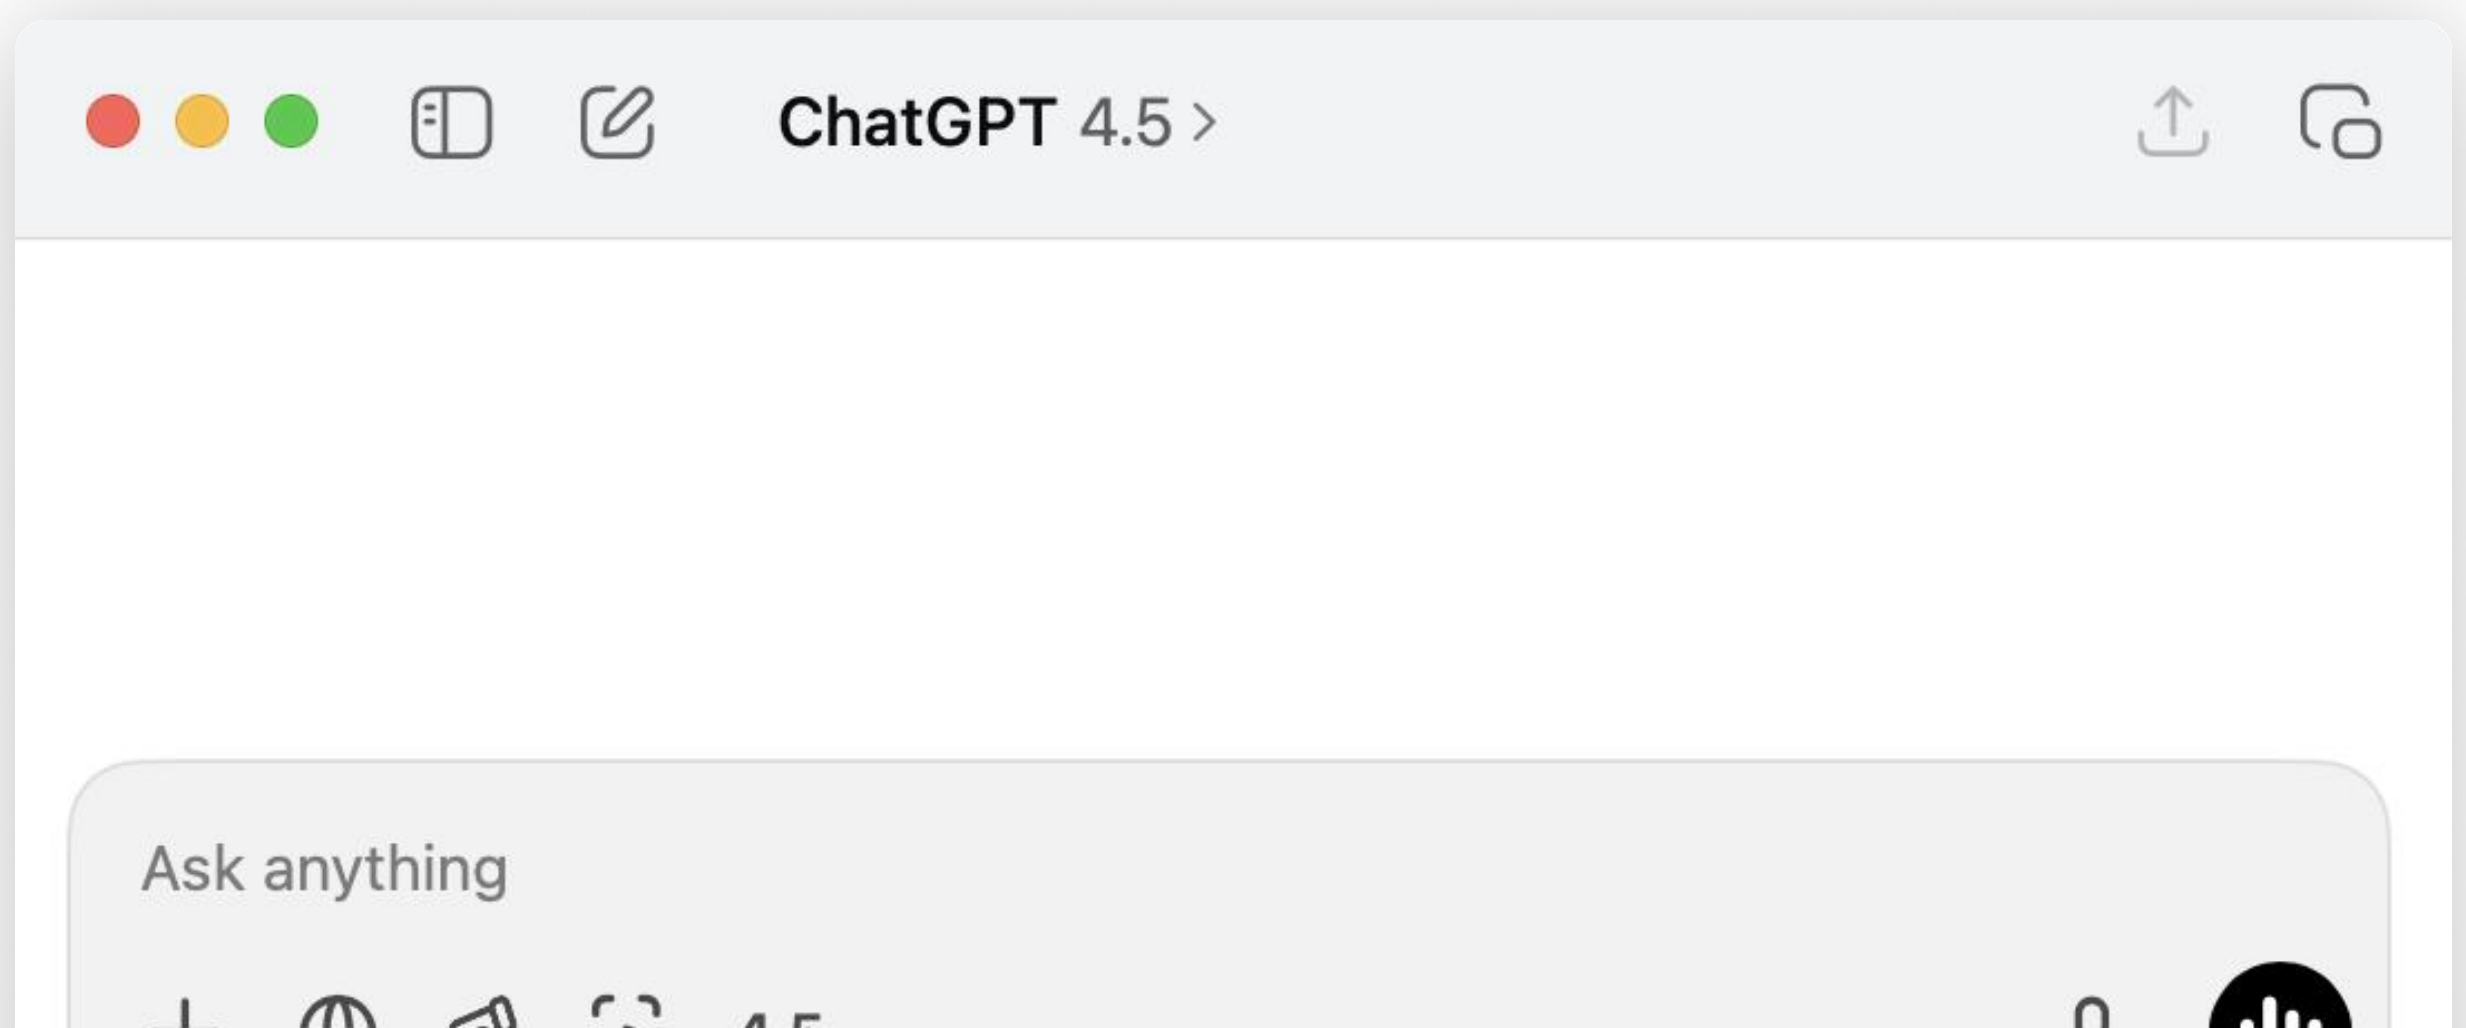

GPT-4.5

Ideal for creative tasks: Emotional intelligence, clear communication, creativity, and a more collaborative, intuitive approach to brainstorming.

Example Prompts:

- Create an engaging LinkedIn post about AI trends.
- Write a product description for a new feature launch.
- Develop a customer apology letter with an empathetic tone.

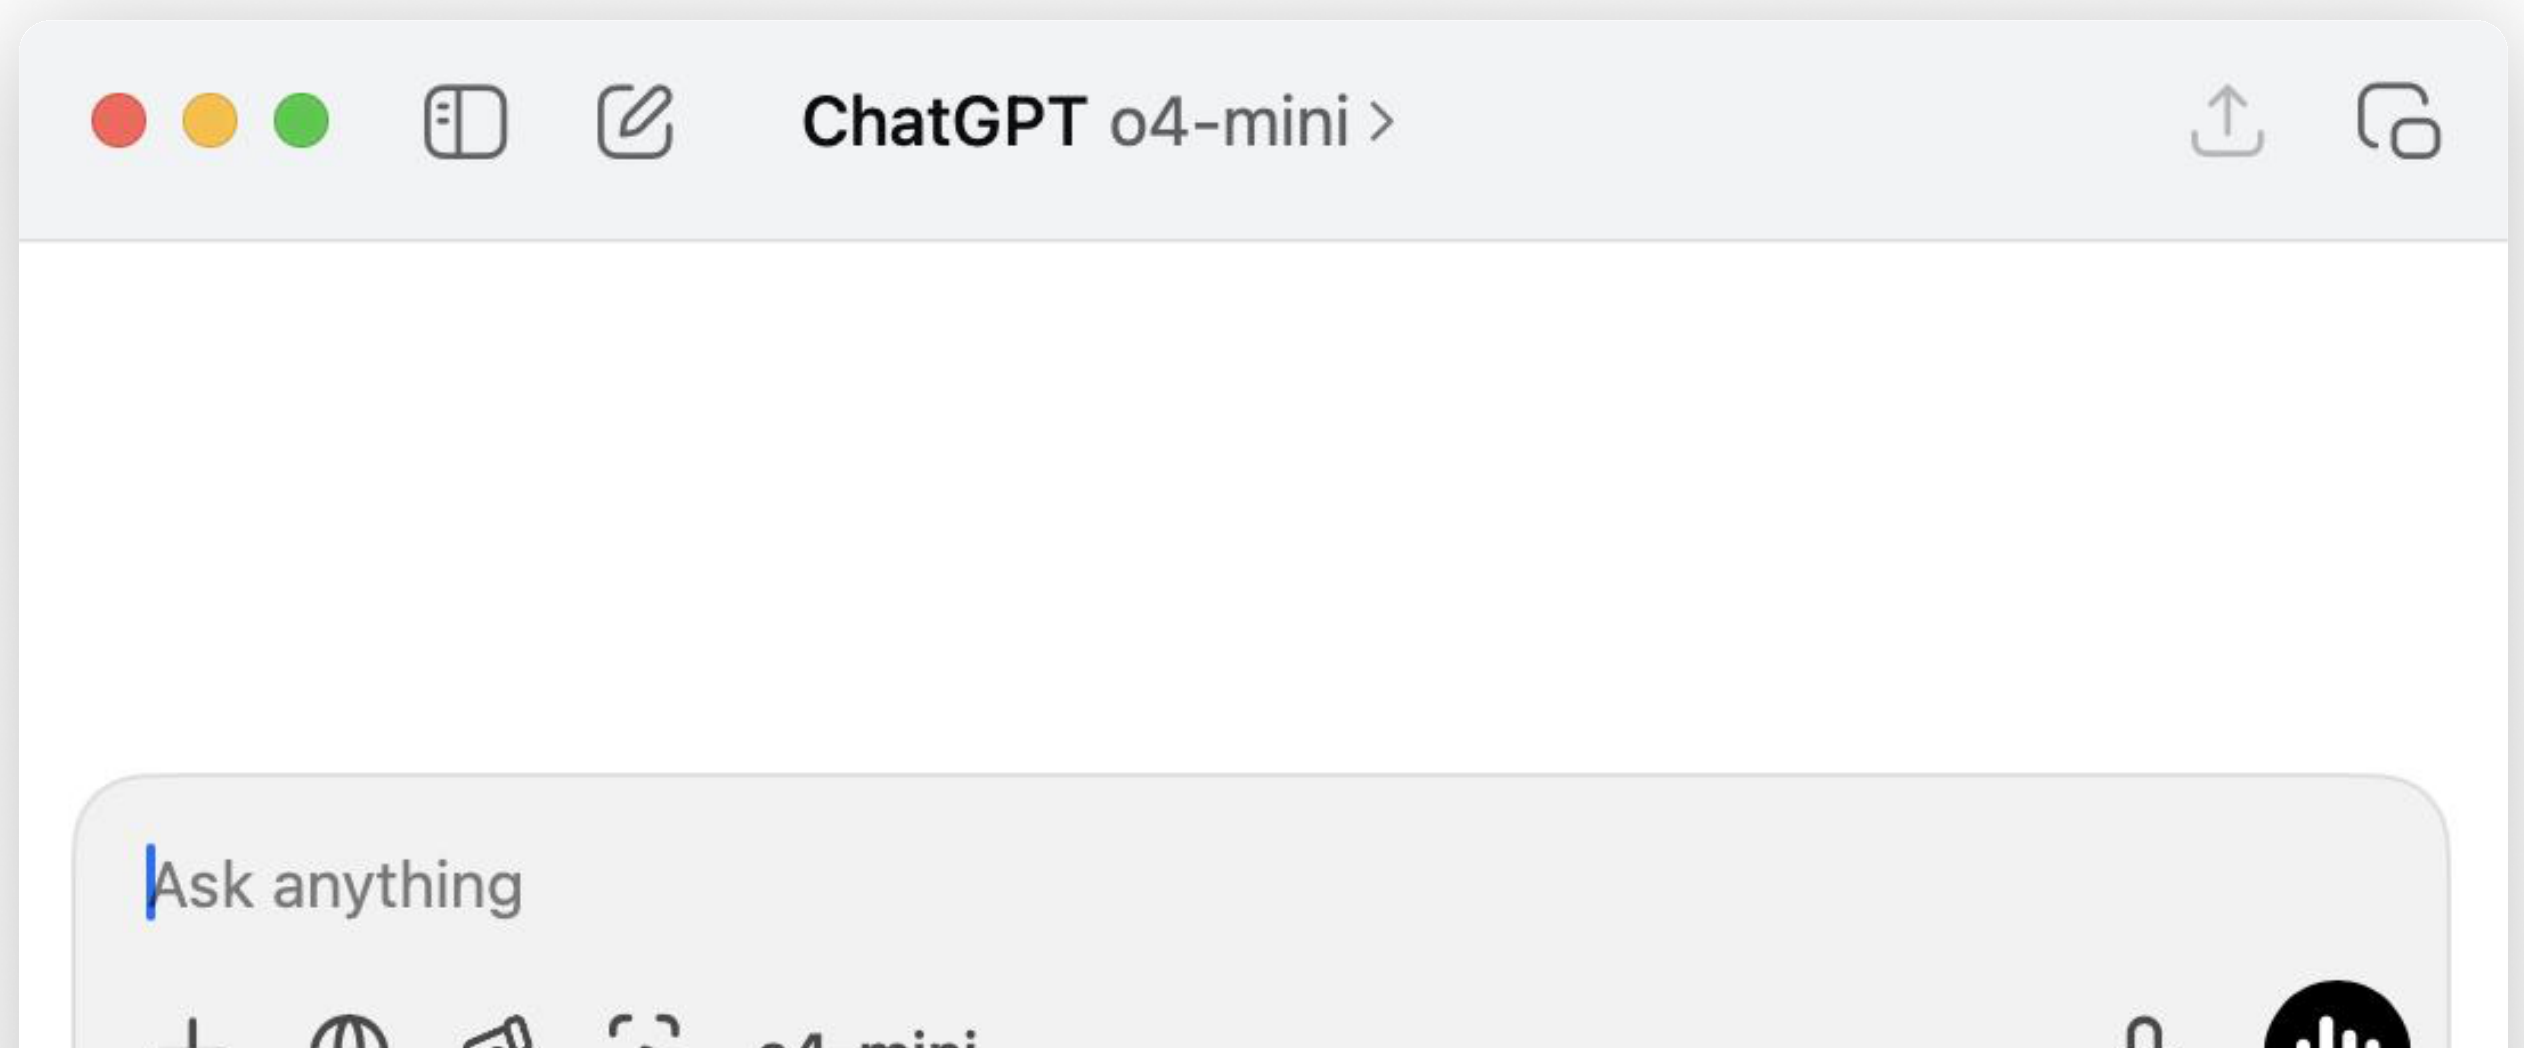

GPT-o4-mini

Fast technical tasks: Quick STEM-related queries, programming, visual reasoning.

Example Prompts:

- Extract key data points from a CSV file.
- Provide a quick summary of a scientific article.
- Quick-fix this Python traceback for me.

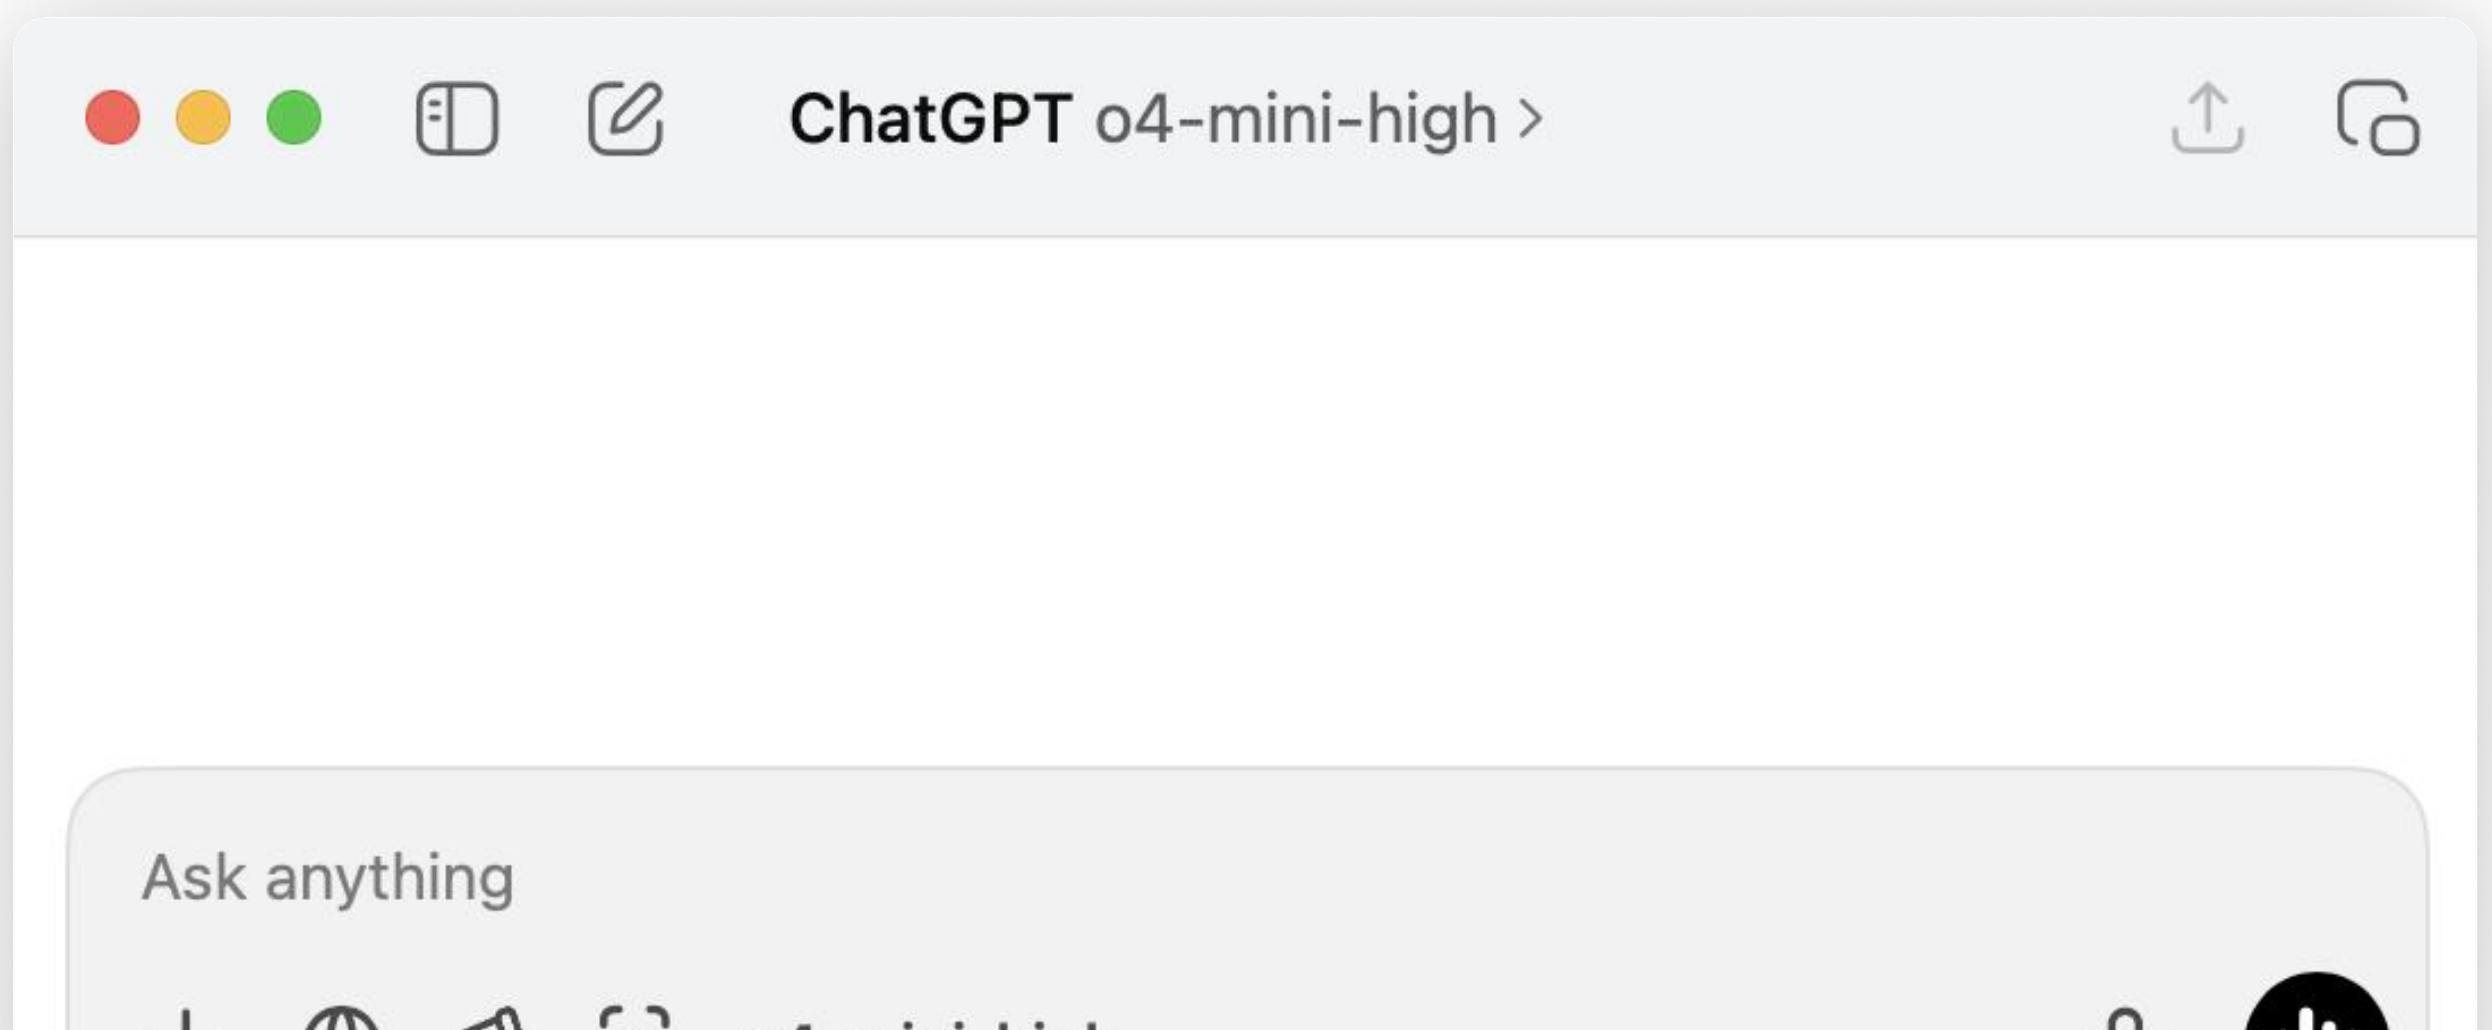

GPT-o4-mini-high

Detailed technical tasks: Advanced coding, math, scientific explanations, thinks longer for higher accuracy.

Example Prompts:

- Solve a complex math equation and explain the steps
- Draft SQL queries for data extraction.
- Explain a scientific concept in layman's terms.

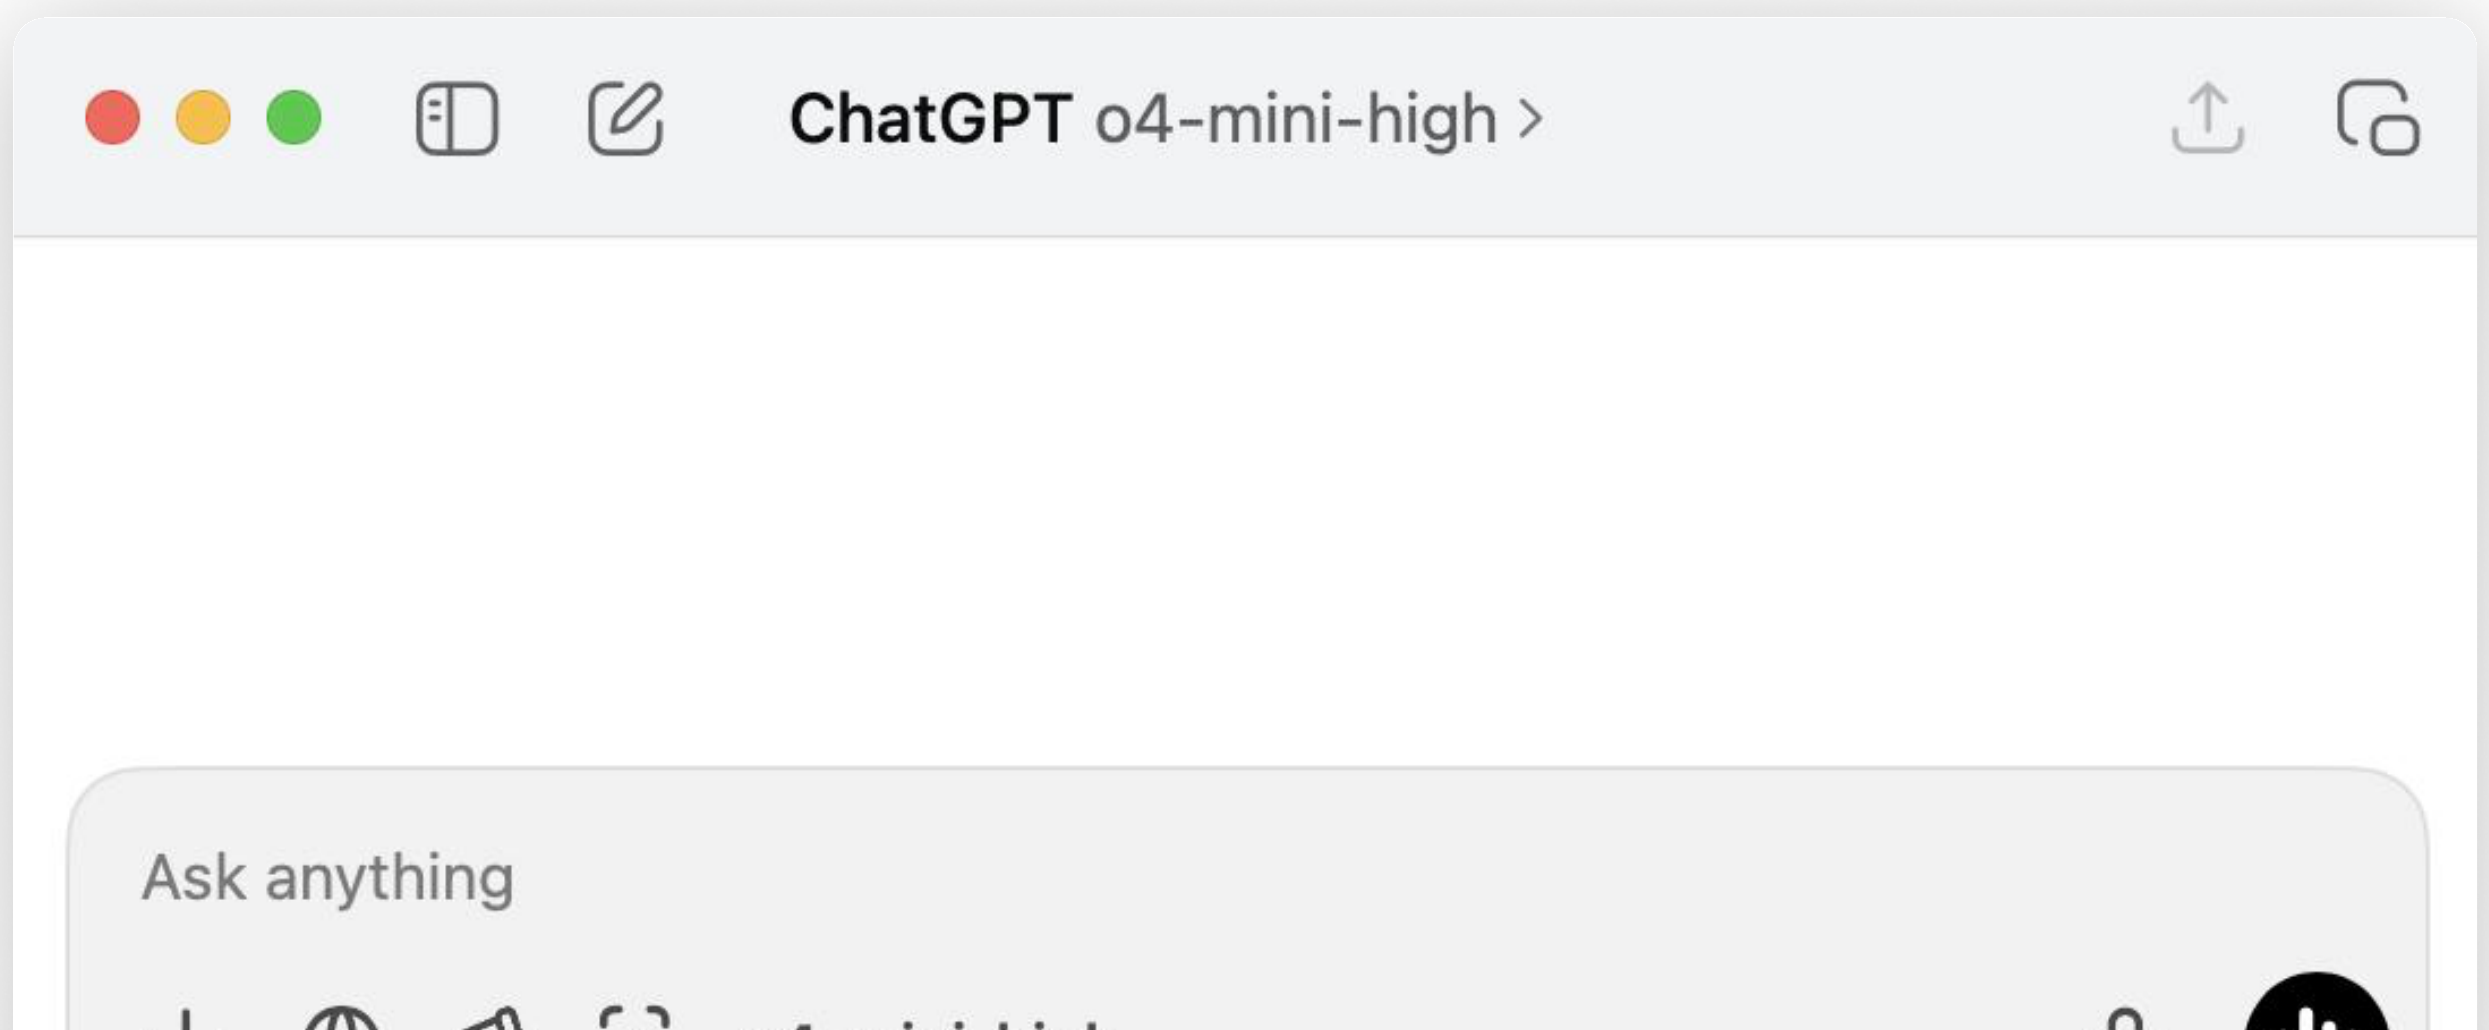

GPT-o3

Complex, or multi step tasks: Strategic planning, detailed analyses, extensive coding, advanced math, science, coding, and visual reasoning.

Example Prompts:

- Develop a risk analysis for market expansion.
- Draft a business strategy outline based on competitive data.
- Run a multi-step analysis on this CSV—forecast next quarter and plot the trend.
- Review pipelines metrics, visualize the data, and search for new top of funnel strategies

GPT-o1 pro mode

Complex reasoning: takes a bit longer to think but delivers the accuracy you need for complex tasks.

Example Prompts:

- Draft a detailed risk-analysis memo for an EU data-privacy rollout.
- Generate a multi-page research summary on emerging technologies.
- Create an algorithm for financial forecasting using theoretical models.
